DAUR SUPPLY / LACE TAG (DEUBRE) / DRAWN 5x LARGER

Real size 30 x 12 mm. Use the 1to1 SVG files for the laser machine.

Material: brass, about 1 mm thick, brushed or satin finish (gunmetal plating as second option).

Corners: 2 mm radius. Edges deburred so they do not cut the lace.

Front: DAUR wordmark, laser engraved, 17 mm wide, centred. Back (optional): NAYA DAUR.

Slots: 2.4 x 9.5 mm, so a flat lace up to 9 mm wide slides through.

Placement: on the lowest pair of eyelets (closest to the toe), wordmark facing up.

Approve one physical sample before ordering the batch.
